Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

this ck is located in the SW corner of Ruth Bay on the west side of
Izhut Bay. Surveyed by foot via M/V Cotto. Appears to be a man made
system as there were logs in place preventing fish from getting to
falls area. Approximately 23 yds of available spawning habitat. SEE 1989 BOOKS

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
